

Win back your hours. Let AI do the heavy lifting.

A practical, hands-on AI workshop for advocates — research faster, draft sharper, and manage your matters with confidence.

Research in Minutes

Summarise long judgments, statutes, and case files instantly — find the point without reading a hundred pages.

Draft Faster

Generate first drafts of notices, applications, agreements, and opinions — then refine in your own voice.

Organise Matters

Build chronologies, extract key dates, structure briefs, and prepare clear notes for hearings.

Communicate Clearly

Turn complex legal points into plain-language client emails and summaries in seconds.

Hours saved

Routine drafting and reading consume the most billable time. The advocates who learn to work alongside AI today will move faster, take on more, and stay ahead of those who don't.

— What You Will Learn

- ✓ Prompting for legal work — a simple, repeatable method for accurate, useful results.
- ✓ The leading tools compared — ChatGPT, Claude, Gemini, and Copilot, and which suits which task.
- ✓ Real practice tasks — hands-on with research, drafting, and summarising on the work you do daily.
- ✓ Spotting errors & "hallucinations" — verify output so a wrong citation never reaches the court.

Responsible & confidential by design. Our training stresses verifying every output, protecting client confidentiality and privileged data, and using AI as an assistant — never a substitute for your professional judgement.
