PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and AI Prompt Engineer with 1.5+ years of professional experience building production-ready web and mobile applications using React.js, React Native, Node.js, Python, and Django. Hands-on expertise in AI prompt engineering with Large Language Models (LLMs) including Claude and Gemini, enabling accelerated development of complex, scalable systems. Independently delivered live commercial projects including e-commerce platforms and full-featured accounting software with REST API backends. Proven ability to manage end-to-end project ownership — from architecture and UI to cloud deployment — while maintaining high code quality and performance standards.

TECHNICAL SKILLS

AI & Prompt Engineering: Claude (Anthropic), GitHub Copilot, Chain-of-Thought Prompting, Few-Shot Prompting, Context Engineering, Prompt Optimization, n8n workflow, AI Integration

Frontend: React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Python, Django, Node.js, REST APIs, MySQL, SQLite

Tools & Integrations: Git, GitHub

WORK EXPERIENCE

Full Stack Developer

VRSA Insolvency Firm | *Delhi, India* | *June 2025 – Present*

- Building a full-featured Tally-inspired accounting software with additional advanced features using React.js, Python, Django, and MySQL
- Modules developed: Company Setup, User Management, General Ledger, Profit & Loss, Balance Sheet, Cost Allocation, GST Reports, and Financial Reporting
- Leveraging AI prompt engineering (Claude) to accelerate development and solve complex financial logic and database architecture challenges
- Designing and implementing REST APIs with Django backend to handle multi-user accounting workflows

Software Development Engineer 1 (SDE-1)

Bluwheelz Mobility Services Pvt Ltd | *Delhi, India* | *September 2024 – June 2025*

- Built EV Charging Station Finder mobile application (React Native) with live GPS tracking, custom map integration, and polyline route drawing
- Developed Wallet and Rental Payment System with EaseBuzz payment gateway — end-to-end integration handled independently
- Applied AI prompt engineering techniques with Claude and LLMs to reduce development time by 60% on complex features, backend debugging, and API architecture

PROJECTS

Tally-Inspired Accounting Software

React.js | *Python* | *Django* | *MySQL* | *AI Prompt Engineering* | *Status: In Development*

- Full-featured accounting software with advanced modules beyond standard Tally capabilities
- Complete financial reporting suite: GL, P&L, Balance Sheet, Cost Allocation, GST Filing

- Built solo using iterative AI prompting strategies for complex financial logic implementation

Cost2Cost — E-Commerce Platform

React.js | Node.js | Razorpay | [Live: cost2cost.in](https://cost2cost.in)

- Multi-category e-commerce platform with live payment processing — serving real customers
- Solo built using AI-driven development; prompt-engineered complete backend API and database schema

EV Charging Station Finder — Mobile App

React Native | Custom Maps | GPS | Status: Internal Use

- Real-time live location tracking, custom map rendering, and polyline route drawing between source and destination
- Overcame complex mobile mapping challenges using targeted AI prompting with no prior experience in mobile maps

EDUCATION

Bachelor of Computer Applications (BCA)

Chaudhary Charan Singh University, Meerut, India | Graduated 2024

AI PROMPT ENGINEERING EXPERTISE

- 1.5+ years of daily hands-on experience with LLMs: Claude (Anthropic), Gemini, Blackbox AI
- Built 5+ production-level projects entirely through AI-assisted and AI-driven development workflows
- Expert in prompt structuring for code generation, debugging, system design, API architecture, and documentation
- Proficient with AI coding agents: Cline, Roo Code, GitHub Copilot for end-to-end development
- Deep understanding of LLM strengths and limitations — skilled at iterating and refining prompts for optimal results
- Experience prompting for complex domains: financial software logic, payment gateway integration, mobile app development, database architecture
